Forward-Looking Statements and Non-GAAP Financial Information

Certain statements included in this presentation may be considered forward-looking statements. These forward-looking statements are often, but not always, identified by the use of words such as “seek”, “anticipate”, “plan”, “estimate”, “expect”, “intend” and statements that an event or result “may”, “will”, “should”, “could”, or “might” occur or be achieved and other similar expressions. More specifically, this presentation contains forward-looking statements which include, but are not limited to statements regarding: the Company’s corporate strategy and strategic objectives; the availability of external financing to fund the Company’s ongoing liabilities and commitments; the direct and indirect impact of the COVID-19 pandemic on the Company’s business and operations, including supply chain, manufacturing, research and development costs, contracted service providers and employees, and general business and economic events. These forward-looking statements involve risk and uncertainties, including the impact on the Company given its current liquidity situation, the difficulty in predicting product approvals, acceptance of and demands for new products, the impact of the products and pricing strategies of competitors, delays in developing and launching new products, the regulatory environment, fluctuations in operating results, and other risks, any of which could cause results, performance, or achievements to differ materially from the results discussed or implied in the forward-looking statements. Such forward-looking statements should not be taken as guarantees of future performance of Covalon.

All forward-looking statements are based on Covalon’s current beliefs as well as assumptions made by and information currently available to Covalon and relate to, among other things, anticipated financial performance, business prospects, partnership opportunities, strategies, regulatory developments, market acceptance and future commitments. The reader is cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this presentation.

Due to risks and uncertainties, including the risks and uncertainties identified by Covalon in its public securities filings, actual events may differ materially from current expectations. Covalon disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

Certain financial measures in this presentation – namely earnings before interest, depreciation and amortization (“EBITDA”), adjusted EBITDA, pro-forma EBITDA, free cash flow and enterprise value – are non-IFRS financial measures. While Covalon and certain of its competitors measure and evaluate the performance of their respective consolidated operations and business segments with reference to these and similar measures, non-IFRS measures do not have any standardized or prescribed meaning under IFRS or otherwise and therefore are unlikely to be comparable to similar measures presented by other companies. These non-IFRS measures should not be considered in isolation or as a substitute for financial measures prepared in accordance with IFRS. All non-IFRS measures are included because management monitors and uses the information on a regular basis to analyze the performance of the business and therefore may be considered useful information.

For further information about the risks and uncertainties relating to forward-looking statements included in this Memorandum, the recipient should consult the “Risks and Uncertainties” section of Covalon’s annual MD&A dated January 25, 2023, as well as those contained in Covalon’s interim MD&As and other public record filings on SEDAR.

All figures are in Canadian dollars, unless otherwise noted, and Covalon’s fiscal year end is September 30th.

covalon TECHNOLOGIES LTD.

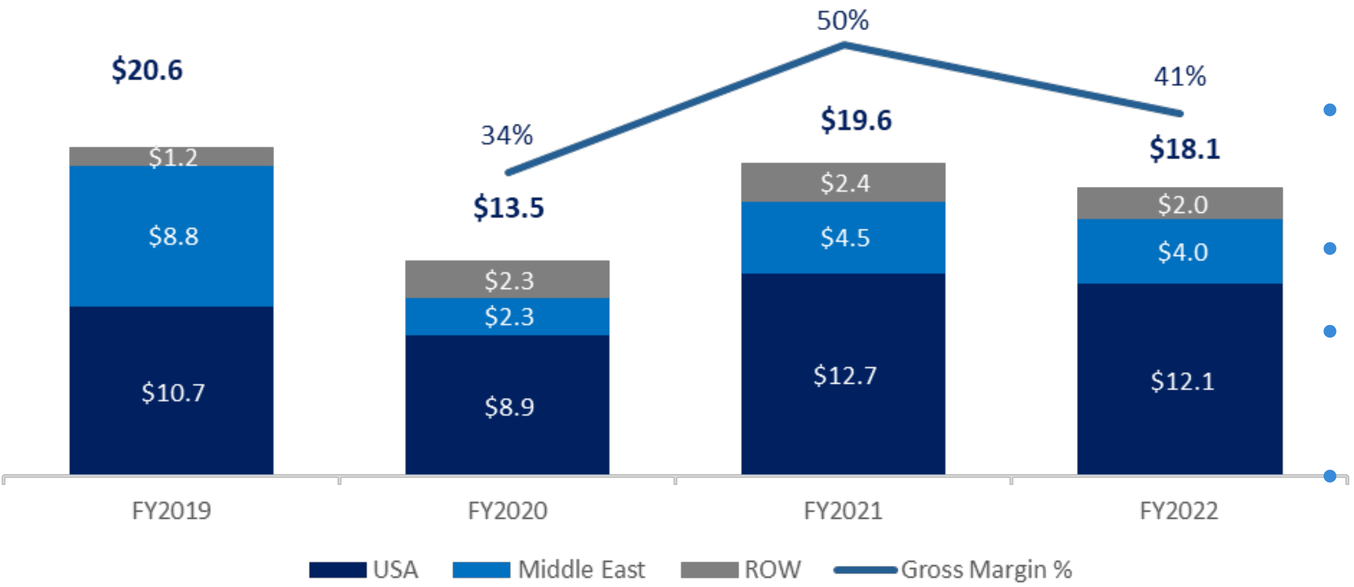
For the year ended September 30, 2022

Revenue Profile and Margins



Pre-COVID **COVID Impact** **Recovery and Growth** →

55% 2022 Adjusted Gross Margin[1]

Key Takeaways

- COVID recovery underway in the U.S. with ROW markets slower to recover
- Collagen revenue in the U.S. down $0.6M in 2022 due to timing of orders.
- Forecasting revenue growth for 2023
- Decline in International revenue due to exiting U.K. market
- Gross margins are heavily influenced by inventory provision and product mix
- Focused on improving overall gross margins with higher margin sales mix and cost savings in supply chain improvements
- New in-house manufacturing of collagen dressings to create capacity and meet customer demand, while improving product margins

covalon TECHNOLOGIES LTD.

[1]Adjusted for inventory provisions and product re-work costs.
